

# LINESTOP Service

Tecpesa is prepared to adapt to the particular needs of each client, to optimize its resources and provide the best solutions. Thanks to our experience, we are able to solve possible obstacles that may arise, this way we can anticipate and solve any problem before it happens.

Tecpesa is fully aware of the importance and seriousness of the work we do, so all services are performed by highly qualified and certified staff.

**TECPESA** realizes Simple or Double **Linestop Services**, with or without Bypass, from 1" to 48", temperature up to 250°C, all kind of fluids. For Double Linestop without Bypass, flow velocity during the operation has to be 0 m/s. When Bypass is used, the maximum flow velocity during the operation is 5 m/s.
